Pius XI – (Achille Ratti)

Pius XI – (Achille Ratti)

Ulrich T. Schwarz
Universität Regensburg

On February 12, 1931, the Marquis Marconi spoke these historical words:

I have the highest honor of announcing that in only a matter of seconds the Supreme Pontiff, Pope Pius XI, will inaugurate the Radio Station of the Vatican City State. The electric radio waves will transport to all the world his words of peace and blessing.

This is how the world-renowned scientist Guglielmo Marconi announced the birth of Vatican Radio. He then continued: With the help of Almighty God, who allows the many mysterious forces of nature to be used by man, I have been able to prepare this instrument which will accord to the Faithful of all the world the consolation of hearing the voice of the Holy Father.

VATICAN OBSERVATORY

VATICAN OBSERVATORY

The Vatican Observatory, one of the oldest astronomical research institutions in the world, has its headquarters at the papal summer residence in Castel Gandolfo, Italy, outside Rome. Its dependent research center, the Vatican Observatory Research Group, is hosted by Steward Observatory at the University of

Arizona, Tucson, USA.

The Vatican Observatory Research Group operates the 1.8m Alice P. Lennon Telescope with its Thomas J. Bannan Astrophysics Facility, known together as the Vatican Advanced Technology Telescope (VATT), at the Mount Graham International Observatory (MGIO) in southeastern Arizona.
