Dr. Muhannad Al Aiti (Sicherheitsbeauftragter/Safety Inspector)

Office: HAL 120

E-Mail: Muhannad.Al_Aiti@tu-dresden.de

Outline

1. General safety rules
2. Fire prevention and behavior in case of fire
3. Behaviour in case of emergency
4. General information

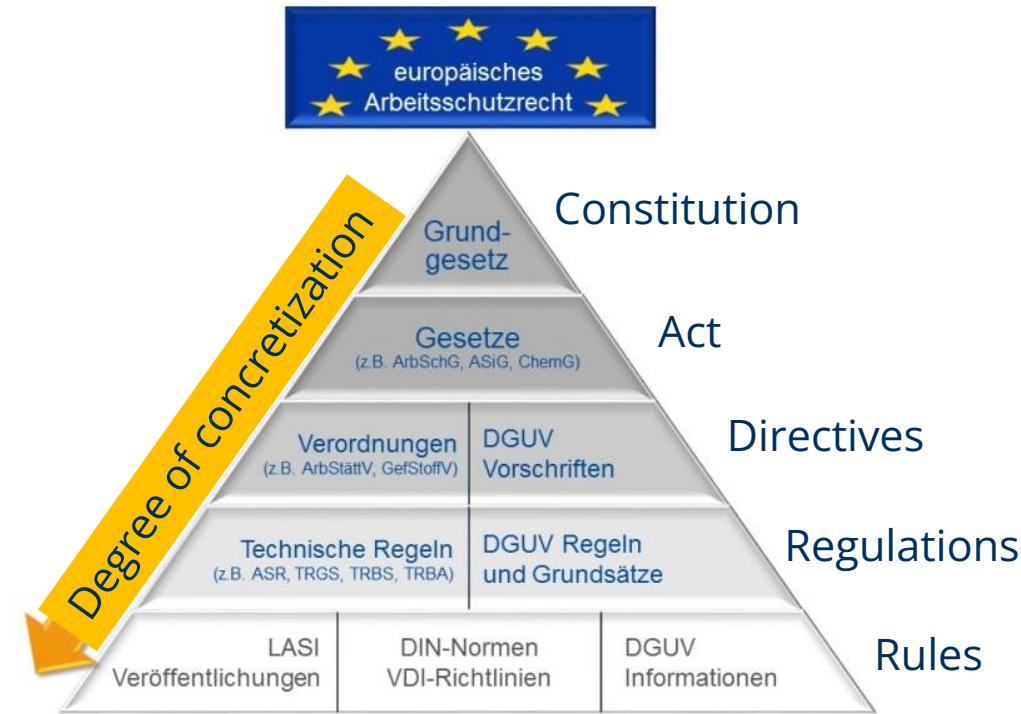

German Occupational safety system

Dual occupational safety and health system in Germany

| State occupational health and safety law | Accident insurance |
|--|---|
| Saxony State Directorate, Dept. 5 Occupational Health and Safety | Accident Insurance Fund Saxony |
| Act, regulations, etc. | Accident prevention regulations |
| e.g. Occupational Health and Safety Act, Workplace regulation, Industrial Safety and Health regulation | z.B. DGUV-Regulation; 1- Prevention, DGUV-Regulation 2- Company physicians and occupational safety specialists |

Rights and obligations for employers and employees

Rights and Duties

Employee

- **Compliance with instructions** of the employer (the supervisor) for the purpose of accident prevention.
- **Immediate reporting** of work-related health problems.
- **Proper use** of equipment/work materials
- Use of **personal protective equipment**
- Elimination of minor defects
- **Immediate reporting of major defects** to the supervisor
- Attention to access prohibitions to certain work areas
- Attention to prohibitions on the use of certain facilities

"Guess what you forgot to take with you this morning!"

<https://www.pinterest.de/pin/473652085788818133/>

Rights and Duties

Employer

- **takes measures** to prevent occupational accidents, occupational diseases, work-related health hazards and to provide effective first aid
- **NOT** to give instructions that are **contrary to safety regulations**
- prepare **risk assessment**
- instruct **insured persons** on occupational safety and health, hazards associated with their work and preventive measures, **at least annually**
- makes sure that **employees are competent to perform work** in the event of a dangerous defect
- **Decommissioning** the work equipment or similar until the defect has been rectified.
- provides **personal protective equipment** (PPE) free of charge

| Counts | 75 | 9 | 25 | 3 | 18 | 38 | 36 | 2 | 1 | 31 | 238 | 12 | 84 | 34 | 130 | 368 | |

1. General safety rules

STOP principle: protection of workers from the risks of dangerous substances in workplaces

Substitution of the dangerous substance with a safer alternative

Technological measures: minimising the concentration of the dangerous substance in the exposure zone

Organizational measures: minimising the number of exposed workers and/or the duration and intensity of exposure.

Personal protective equipment: wearing protective clothing or equipment such as goggles and gloves as a barrier to exposure

1. General safety rules: Laboratory Safety

RULE 1: Plan Your Work

RULE 2: Follow All Safety Procedures

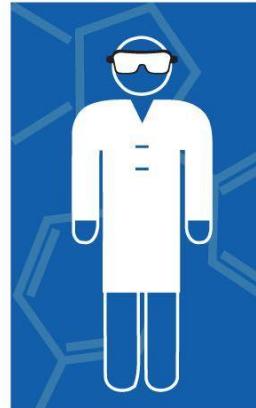

RULE 3: Know Emergency Procedures

RULE 4: Practice Good Housekeeping and Personal Hygiene

RULE 5: Transport Chemicals Safely

RULE 6: Unattended Operations

RULE 7: Report Dangerous Activities

Dress appropriately

Tie back long hair, and wear suitable gloves, goggles, and other protective equipment.

Proper supervision

Don't perform lab experiments without instructor supervision (unless given permission to do so).

Know location of emergency numbers & safety equipment

Know the location of safety equipment and emergency phone numbers (such as poison control) so you can access them quickly if necessary.

No food

Don't eat or drink in the lab—and never taste chemicals.

ID hazards

Identify hazardous materials before beginning labs.

Be attentive

Be attentive while in the lab. Don't leave lit Bunsen burners unattended or leave an experiment in progress.

Be careful when handling hot glassware

Turn off all heating appliances when not in use. Keep flammable objects away from your workspace.

Stay safe when conducting your labs by following these guidelines.

Keep a clean workspace

Don't obstruct work areas, floors, or exits. Keep coats, bags, and other personal items stored in designated areas away from the lab. Don't block sink drains with debris.

Handle glassware carefully

Properly dispose of anything that breaks. Report cuts, spills, and broken glass to your instructor immediately.

Clean up

After completing the lab, carefully clean your workspace and the equipment, and wash your hands.

1. General safety rules

Prevention is the most important thing to avoid accidents!

- Avoid collection of flammable materials in the laboratory or in the building;
- Take care about timely safety check of the electrical devices in the lab and in the offices (periodical safety check!);
- Avoid situation that can cause fire: e.g. candles (please use electrical candles), open fire;
- Barbecue in the garden....!!

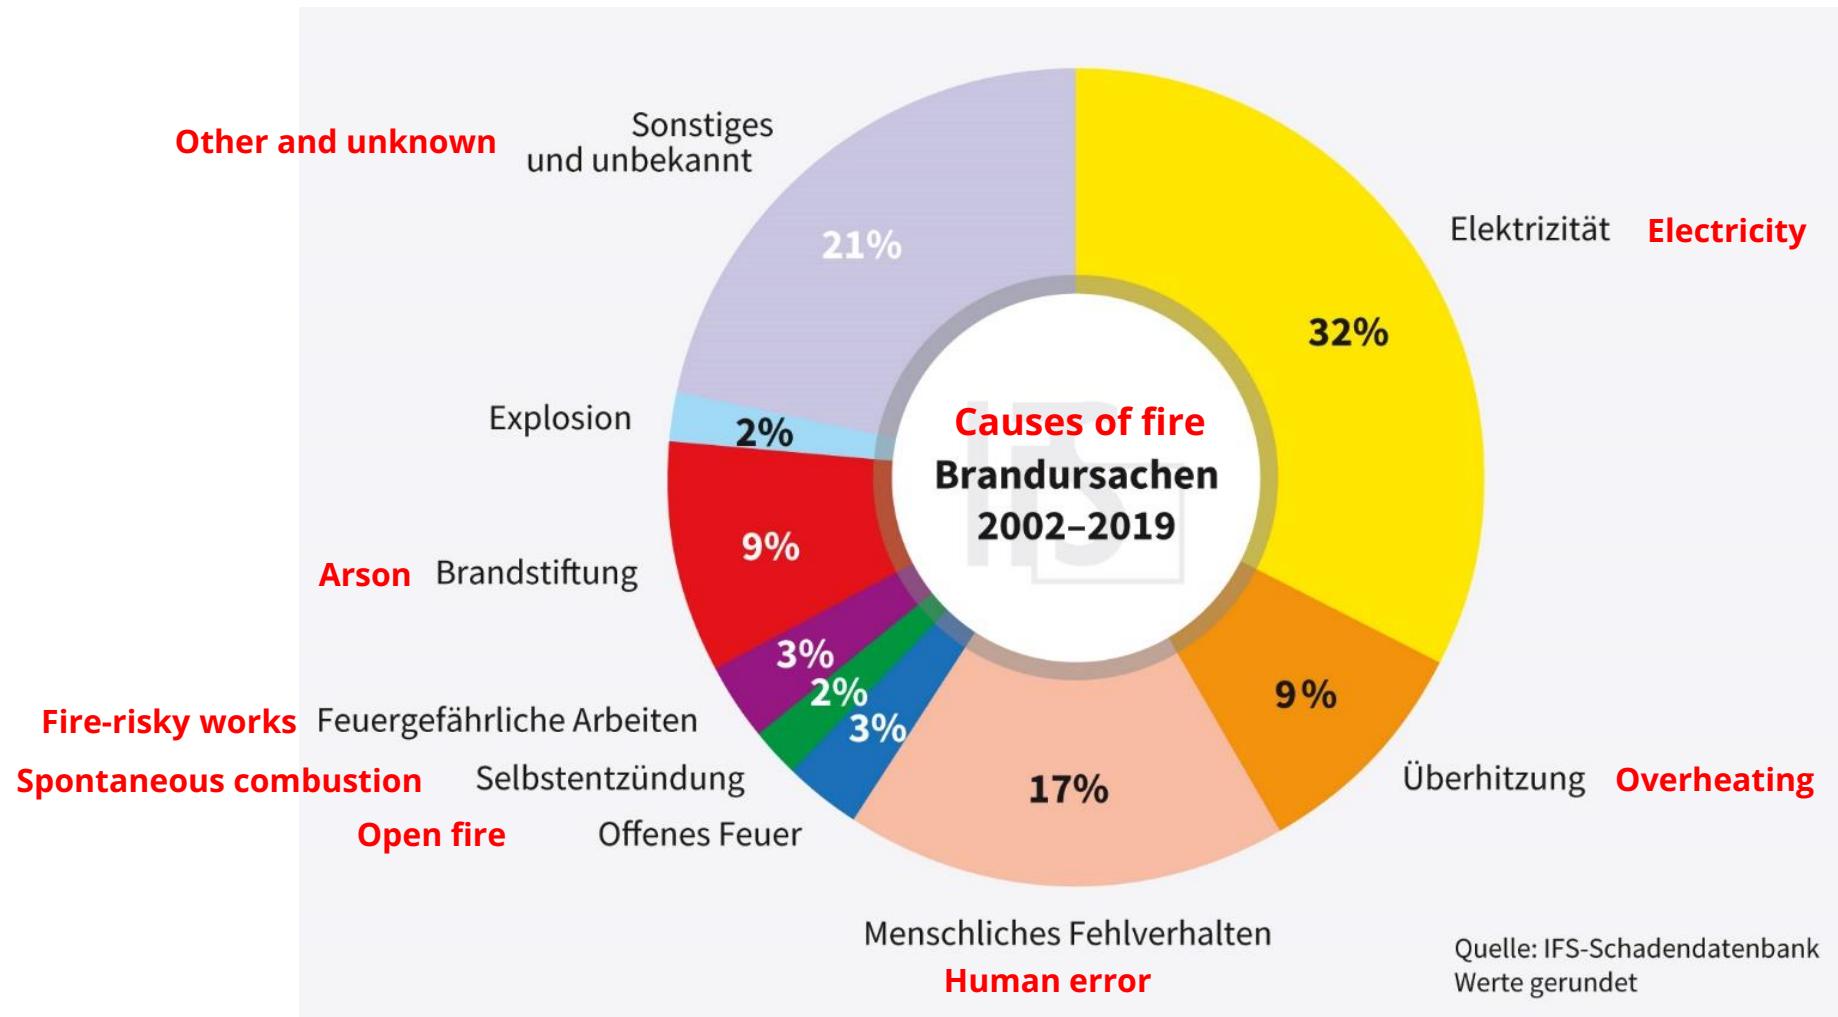

2. Fire prevention and behavior in case of fire

Fire tetrahedron

<https://guides.firedynamicstraining.ca/g/structural-firefighting-fundamentals-of-fire-and-combustion/116486>

Fire prevention

<https://www.ifs-ev.org/schadenverhuetung/ursachstatistiken/brandursachenstatistik/>

Fire prevention

Major fire causes:

- defective electrical devices
- flammable liquids/gases

Electrical devices have to be checked

- before first use
- in offices every 2 years, in labs every year
- use of immersion heaters not allowed
- use of private electrical devices only with permission of the Head of the Chair (e.g. Laptops)
- electrical junctions not in series

Switch off devices after finishing work
(except the ones approved for permanent operation):
PC in offices, projectors, power supplies, screens,
printers, copy machines

Put cookers on fire-resistant basis

Do not cover ventilation opening (PC, printers, etc)

Ursachen:

- defekte elektrische Geräte
- entflammbare Flüssigkeiten/Gase

Überprüfung elektrischer Geräte

- vor erstem Gebrauch
- in Büros alle 2 Jahre, Labs jedes Jahr
- Tauchsieder verboten
- private Geräte nur mit Erlaubnis des Chefs (z.B. Laptops)
- Verteiler nicht hintereinander schalten

Geräte nach Arbeit ausschalten
(außer permanenter Betrieb):
PC in Büros, Projektoren, Netzteile, Bildschirme,
Drucker, Kopiergeräte

Kocher auf feuerfester Unterlage

Ventilation nicht verstellen

Fire prevention

No open fire (no smoking)

Avoid sparks by electrostatic discharge in labs

Christmas time:

Candle light only under strict conditions

Permission of Prof. Cuniberti

Permanent presence

...

Kein offenes Feuer (Rauchverbot)

Vermeide elektrostatische Funkenentladung bei Versuchen

Weihnachtzeit:

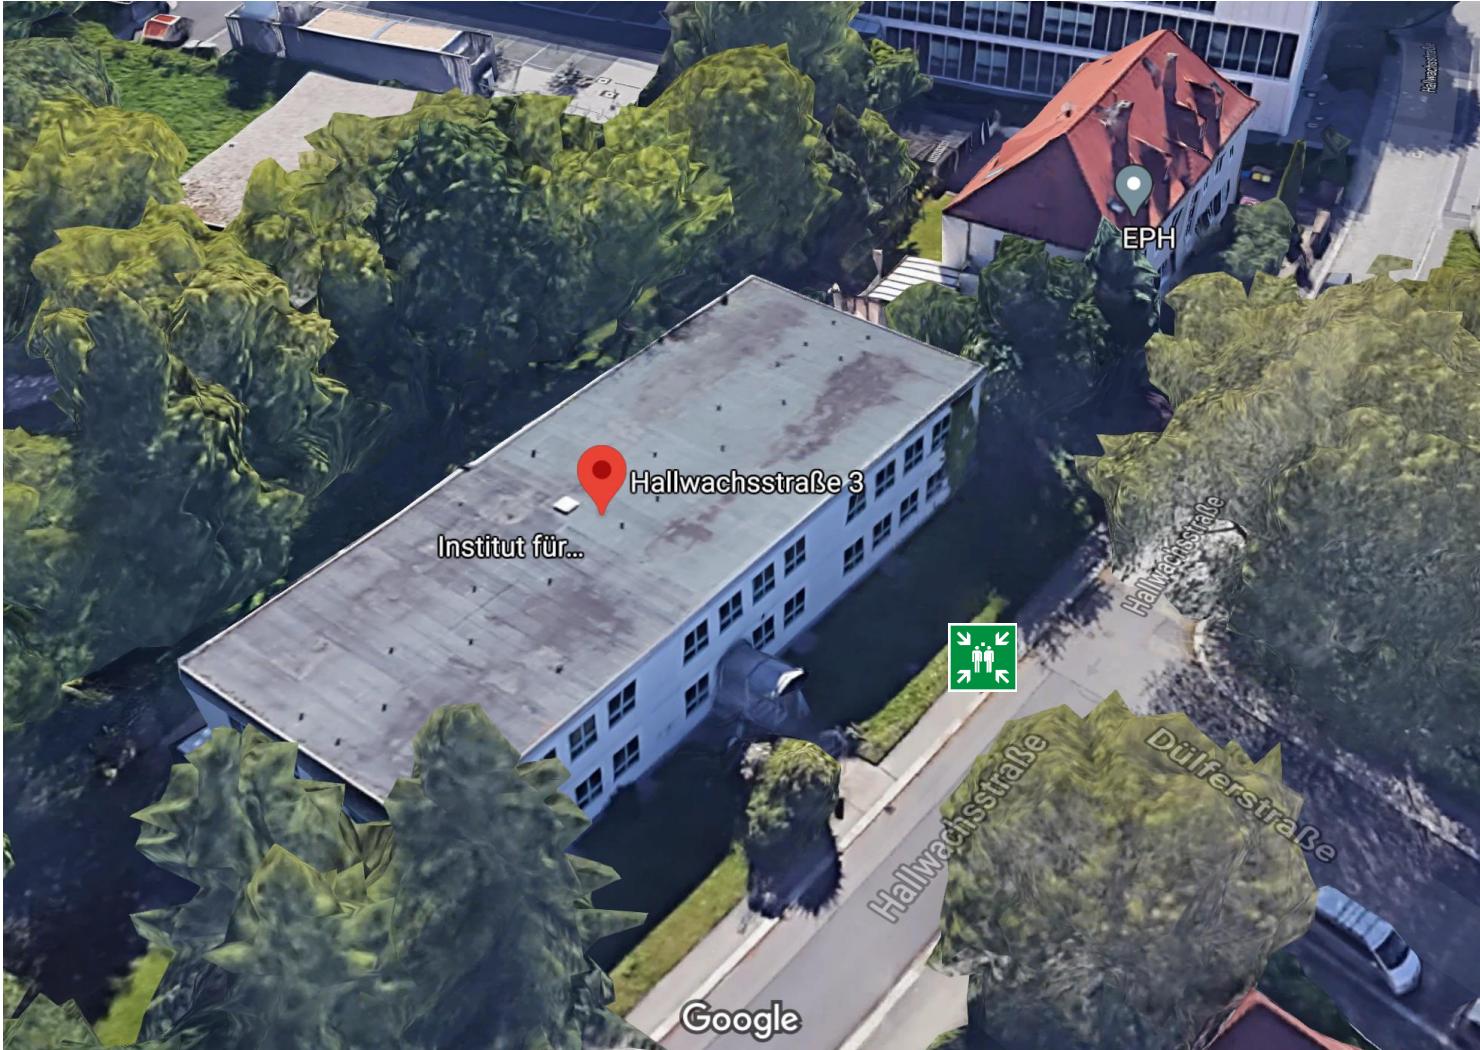

Kerzen nur unter strengen Bedingungen

Erlaubnis von Prof. Cuniberti

ständige Aufsicht

...

Türen schließen

gekennzeichneten
Fluchtwegen
folgen

Aufzug nicht benutzen
Sammelstelle aufsuchen

Feuerlöscher benutzen

Behaviour in case of fire

Highest priority: Save lives

Lowest priority: objects, building

**Close (but do not lock!) doors and windows,
leave the building**

Ground floor: entrance

Basement: emergency exit to the garden

Assembly point:

In the garden opposite the library

Keep escape routes free

Do not fix/block the fire doors

Re-enter building only after permission of the fire
brigade

Höchste Priorität: Leben retten

Niedrigste Priorität: Objekte, Gebäude

**Türen/Fenster schließen, nicht verschließen,
Gebäude verlassen**

Erdgeschoss: Eingang

Keller: Ausgang zum Garten

Sammelpunkt:

Straßenseite gegenüber Eingang

Fluchtwege freihalten

Brandschutztüren nicht durch Keile fixieren

Gebäude nur nach Erlaubnis durch Feuerwehr
betreten

Behaviour in case of fire

Extinguish only small fires by yourself!

Information to TU Security 20000

Burning clothes

Use emergency shower in the lab

Use nearest extinguisher

Caution: freezing by CO₂

Caution: CO₂ in closed rooms

Foam extinguisher for electrical equipment

(only < 1000 V), > 1m distance

No water to extinguish electrical equipment

Nur kleine Feuer selbst löschen!

Information an TU-Sicherheitsdienst 20000

Kleiderbrand

Dusche im Chemielabor

Nächstgelegener Feuerlöscher,

Achtung: Erfrierung durch CO₂

Achtung: CO₂ in geschlossenen Räumen

Schaumlöscher für elektrische Anlagen

(nur < 1000 V), > 1m Abstand

Kein Wasser für elektrische Anlagen

Behaviour in case of fire

Burning person/Personenbrand (TU recommendation)

- The basic rule is: **act quickly! If possible use a hand fire extinguisher (foam or water)!**
- Prevent a burning person from running away and **ask to close eyes and mouth**
- Avoid exposing the face to the extinguishing agent
- Direct the **first** extinguishing impulse to the **upper body** (protects neck and head from leaping flames)
- Then guide the extinguishing jet further down the body and to the sides
- **Minimum distance of 2 to 3 m**
- CO₂ extinguishers should only be used if no other extinguisher (water, foam) is present. Minimum distance 1.5 m, never point the extinguishing jet directly at the face and never stay longer on one part of the body (danger of frostbite!)
- Grundsätzlich gilt: schnelles Handeln! Möglichst Handfeuerlöscher (Schaum oder Wasser) benutzen!
- brennende Person am Davonlaufen hindern und zum Schließen von Augen und Mund auffordern
 - Gesicht möglichst nicht mit dem Löschmittel beaufschlagen
 - ersten Löschimpuls auf den Oberkörper richten (schützt Hals und Kopf vor hochschlagenden Flammen)
 - anschließend Löschstrahl am Körper weiter nach unten und zu den Seiten führen
 - Mindestabstand von 2 bis 3 m
 - CO₂-Löscher sollten nur verwendet werden, wenn kein anderer Löscher (Wasser, Schaum) vorhanden ist. Mindestabstand 1,5m, Löschstrahl nie direkt auf das Gesicht richten und nie länger auf einer Stelle des Körpers verweilen (Erfrierungsgefahr!)

Behaviour in case of fire

Fire classes according to DIN EN 2 and suitable extinguishing agents

| Fire class | Kind of burning material | Suited extinguishing agent |
|------------|--|--|
| | Flammable solid substances that normally burn with the formation of embers (e.g. wood, coal, paper, textiles) | water ABC extinguishing powder extinguishing foam |
| | Flammable liquid and liquefiable substances (e.g. gasoline, alcohol, tar, wax, several plastics) | CO ₂ ABC extinguishing powder BC extinguishing powder |
| | Flammable gases (e.g. acetylene, hydrogen, natural gas, propane) | ABC extinguishing powder BC extinguishing powder |
| | Flammable metals (e.g. aluminum, magnesium, sodium) | Metal fire powder (D-powder) Dry sand Caution: never use water! |
| | Flammable edible fats and oils (e.g. frying oils) | Special extinguishing agent for grease fires (grease fire extinguishers) Caution: never use water! |

Quelle: Anlage 5 zur Brandschutzordnung der TU Dresden, 14. September 2017

Behaviour in case of fire

**When encountering a fire with a lithium-metal battery,
only use a Class D powder fire extinguisher.**

Behaviour in case of fire

Standard values for the performance of portable fire extinguishers/Richtwerte zur Leistungsfähigkeit von Handfeuerlöschern

| Content <u>Inhalt</u> | Discharge time Löschdauer | Range Wurfweite |
|--------------------------|------------------------------|--------------------|
| 2 kg | ca. 6 sec | 4 bis 5 Meter |
| 4 kg | 8-12 sec | 4 bis 5 Meter |
| 6 kg | 10-14 sec | 4 bis 6 Meter |
| 9 kg | 14-17 sec | 5 bis 6 Meter |
| 12 kg | 15-20 sec | 5 bis 7 Meter |

Behaviour in case of fire

How to extinguish a fire

- Hold extinguisher perpendicularly
- Release the safety catch or/and press the button

- Do not spray in the smoke, but extinguish from bottom to top
- Extinguish from front to back
- If possible extinguish with short pushes
- In case of large fire use several extinguishers simultaneously
- Avoid spreading of burning liquids due to spraying
- Keep reserve in extinguisher in case of renewed ignition

Do not endanger yourself !!!

www.youtube.com/watch?v=LfwtD1ki5bM
www.youtube.com/watch?v=am0ZdLXdoDA

Behaviour in case of fire

Fire blankets/Löschecken

- Fields of application: e.g. laboratory, tea kitchen
- Einsatzgebiete: z.B. Labor, Teeküche
- **Not suitable for burning persons!**
- **Nicht bei Personenbränden geeignet!**

Behaviour in case of fire

Extinguish only incipient fires,
toxic smoke gas can be life-threatening

At the first breathing difficulties leave immediately

Danger in case you use CO₂-extinguisher below ground level or in small rooms, high CO₂ concentration toxic

Nur Entstehungsbrände bekämpfen, **giftige Rauchgase können lebensbedrohlich sein**

Bei einsetzenden Atembeschwerden sofort Rückzug antreten

Gefahr bei Einsatz von CO₂-Lösichern unter Erdgleiche oder in kleinen Räumen, hohe CO₂ Konzentration giftig

Behaviour in case of emergency

Behaviour in case of emergency

HOW TO REPORT ACCIDENTS?

<https://tu-dresden.de/tu-dresden/arbeitsschutz-umwelt/arbeits-und-brandschutz/unfaelle>

Employees, including trainees, student assistants, research assistants, interns and TUD students, are legally insured through the **Public Sector Accident Insurer Saxony** (German: Unfallkasse Sachsen, UKS) in the case of accidents directly related to work or study activities, including the way to and from the university.

If **civil servants** are involved in an accident at work, the **State Office for Taxes and Finances** (German: Landesamt für Steuern und Finanzen) is responsible within the framework of work accident management.

FOR Employees:

If a visit to the doctor is necessary, it should be reported immediately that it concerns an accident at work or on the way from/to work. This means that additional payments for medication and treatment are no longer necessary.

- *Small accident report (WITHOUT or up to 3 days of incapacity to work)*
- *Larg accident report (> 3 days of incapacity to work)*
- *commuting accident report (on the way from and to the work)*

FOR STUDENTS

All students at TU Dresden are legally insured when doing study-related activities that are directly related to our university and its facilities (e.g. the library), as well as when commuting to and from the university

The responsible accident insurance institution for TUD employees is

**Unfallkasse Sachsen
Rosa-Luxemburg-Straße 17 a
01662 Meißen**

The accident insurance covers personal injury. With the exception of assistive devices (e.g. glasses), the accident insurer does not compensate property damage. Statutory accident insurance protection also applies to participation in general university sports.

Please report the accident to the responsible contact person at your faculty as soon as possible. In the event of a sport accident, the responsible contact is the University Sports Centre.
